

Southwick Neighbourhood Development Plan Steering Group

Parish Council update for July/Aug 2019.

Fowlers published their draft Sustainability Report and Site Selection Methodology in July. These documents have been out for Public Consultation and there has been little that the Steering Group could be moving forward with. So no Steering Group meetings have been called during the last 4 weeks and no minutes to submit to the Parish Council

There has generally been very little response to the Public Consultation and what there has been has been collated by Fowlers. Updates to documents will be carried out accordingly and re-published.

The Steering Group can now re-commence regular meetings and progress with Site Assessments and evaluations.

Locality have offered the Parish Council the final installment of Grant Funding for the NDP. The latest grant amount offered is for £2075.50 and will need to be accepted by the Chair before 25th August, otherwise the offer will lapse.
